Interdependence of plants and animals on each other

#### Each student will be able to:

Explain the functions of:

flower fruits seed

Identify the conditions necessary for germination

Predict what would happen to the plant, if conditions necessary for germination are not fulfilled..

Observe & analyse the structure of the seeds with the help of the given activities.

Identify the biotic and abiotic components of the environment.

Differentiate between biotic and abiotic components.

Analyse the relation between biotic and abiotic components.

Evaluate and synthesize the given food chain.

Compare and contrast the relationship between:

- a) Plants and animals
- b) Biotic and abiotic components

Seediology (Flip book) (Art Integration)

Students will bring soaked kidney beans, peas & chick pea. They will explore the parts and functions of the seeds. Dissecting the soaked seeds to observe the structure of the seeds and understand their functions. Make the entry of their observation in the flip book. (Spatial, Observation, Analyse)
